A Brighter Tomorrow

EVER since the war began, the United Nations have been preparing for a Post-War World. Now, with an Allied Victory in sight, these preparations are being hastened—not with over-optimism, but with foresight. For 1944 may well prove to be a Year of Destiny, and we must be ready for the great changes which will challenge our Will to secure the greatest good for the greatest number.

And, for us at home, this Spring should be one of great significance and hope. We can plan for the future, too—we can show our confidence in tomorrow's world by building for tomorrow.

In a modest way, Lovett's can help you plan and build—both for today and tomorrow. We think there is no more lasting structure than that which Nature can provide—nor is there one more beautiful. And Lovett's, in spite of the loss of many faithful employees and of other war-time handicaps, has continued to produce the same high quality stock as in former years, and is ready again with well grown Shrubs, Shade Trees, and a wealth of Ornamentals.

AZALEAS

Not only are these shrubs very popular for landscape planting, but also most of the evergreen varieties are in great demand for forcing in greenhouses. Many florists have difficulty in obtaining sufficient of these gorgeous flowering plants to take care of the Easter and Mother's Day demand.

For many years we have specialized in the production of Azaleas, and this season we have as large a supply of compact, shapely plants as can be found anywhere in the world.

EVERGREEN TREES

Not only are our Evergreen Trees sheared and transplanted frequently, but also they are given ample space for both root and top development. We do not believe that better specimens can be found anywhere; moreover, we invariably grade our evergreens according to the standards adopted by the American Association of Nurserymen.

All prices of Evergreens, quoted in this trade list refer to extra selected specimens, carefully dug with balls of earth, encased in burlap or similar material.
